

Task 4 - Microphthalmia Case Study

Challenge

What is Microphthalmia?

Can Ella detect anything with her right eye? What?

How does Ella's condition affect her?

More challenging:

What happened to Ella's eye when she was still in the womb?

What does the word 'Microphthalmia' actually mean?

How did Ella's condition affect her in one subject in particular at school?

Mega challenge:

Define Microphthalmia in detail.

How does Ella describe her level of depth perception?

Does it sound like Ella's condition has held her back? Explain.

Why does Ella wear glasses if her sight is good in her left eye?
